

SCHOOL-BASED OUTPATIENT SERVICES

We help students
discover their greatness
by providing traditional
outpatient therapy
within the school walls.

WHY PROVIDE SERVICES IN SCHOOLS?

Students receiving therapy within the school are much more likely to consistently participate in treatment than those who must travel to an outside facility during after-school hours.

School-based therapists capitalize on students' existing academic and social networks by observing and treating clients within their natural environment.

"Having a school-based therapist gives our students a place to process their problems and learn productive coping strategies."

**—AN ELEMENTARY SCHOOL
PRINCIPAL**

WHO CAN ACCESS SCHOOL-BASED OUTPATIENT SERVICES?

This program aims to help students who struggle with difficulties with feelings, behaviors or experiences. Students can be referred for services by either school personnel or parents.

HELP YOUR CHILD SUCCEED

Parents are important. A parent's permission must be obtained before the student begins services. Parents are invited to be part of the therapy sessions and are needed for treatment planning.

We partner with schools in **Berks, Dauphin, Lancaster, Lebanon and York Counties.**

Please contact your school to find out if school-based opportunities are offered in your district and how to apply. If school-based opportunities are not offered in your district, you can access general mental health services for all ages by calling patient registration at 1-855-272-1653.

BERKS COUNTY

Reading Psychiatric
125 South 5th Street
Reading, PA 19602
(610) 685-2188
